

Exclusive Launch Promotion

Upgrade Your Analysis: Get ChemiSEM & ChemiPhase FREE with Phenom EDS

We're excited to announce an exceptional sales promotion! Purchase a Phenom with EDS system and receive our advanced ChemiSEM and ChemiPhase technologies absolutely free. This offer is available till September 30th, 2024.

Don't miss out on this limited-time opportunity to elevate your product offerings and stay ahead in the market.

For more details, contact us today and secure your Phenom with EDS system while supplies last.

Promotional details

- This promotion is valid until September 30th, 2024. Orders must be placed by this date to qualify.
- This offer applies only to the purchase of a Phenom desktop SEM with EDS system. Other products and systems are not included.
- Shipment will occur upon product availability and will be scheduled as soon as possible after the order is placed.
- Orders will ship upon availability of the products. No delay in delivery (on request) accepted.
- The promotion is subject to availability, and the promotion may end early if inventory is depleted.

What is ChemiSEM Technology?

ChemiSEM™ Technology, is an advanced and revolutionary solution designed to address the complex needs of customers in material characterization. It caters to the curious minds seeking to understand the composition of intricate materials, unravel the secrets of their samples, and detect even the tiniest impurities.

ChemiSEM brings together live quantification and decades of EDS analysis expertise to deliver elemental information quickly and effortlessly. With ChemiSEM™, you get reliable results, uncover hidden features, and access complete data, all at your fingertips.

Phase analysis with ChemiSEM Technology

Introducing ChemiPhase, the game-changing feature in ChemiSEM that's revolutionizing phase analysis. Imagine pinpointing unique material phases effortlessly. With ChemiPhase's advanced big data approach, detecting statistically significant spectra within your datacube is a breeze.

Complex materials analysis

Characterizing diverse phases has never been easier. ChemiPhase, the unbiased statistical engine, leaves no room for error, avoiding unexpected element misses due to overlaps or intensities.

Experience the Benefits:

- Automated Brilliance: Say goodbye to user bias. ChemiPhase handles the heavy lifting without prior element identification.
- Pixel-Perfect Precision: Identify major and minor components down to a single pixel, free from peak overlaps.
- Speed and Reliability: Achieve phase determination in under a minute, even from minimal X-ray data (just 10 counts per pixel).
